

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. HERALD'S OFFICE IN IRELAND.

DUBLIN:

ALEXANDER THOM, PRINTER AND PUBLISHER,

87, ABBEY-STREET.

1846.

ENTERED AT STATIONERS' HALL.

ADVERTISEMENT.

HAVING already set forth the design and object of this Publication in circulars to those principally interested therein, and finding, that to enter upon the subject at any length, would far exceed the usual limits of an advertisement, I merely observe, for the present, that I hold myself in readiness to afford every needful explanation, and shall promptly and fully reply to any communication with which I may be favoured.

This work professes to supply a faithful transcript of official records, and is strictly confined to that only. In all cases, therefore, where the armorial ensigns have been duly registered, and the pedigrees recorded *to the present time*, the names have been carefully copied from the record in exact seniority and order of birth. Where, however, pedigrees have been registered with the arms, but as yet not fully written up, all known members of such families have been printed, to proclaim as widely as possible their just claim to Arms. And, lastly, where the Arms alone have been recorded, a few leading names are placed without reference to descent, of which the Herald's Office can have no official cognizance whatever.

WILLIAM SKEY, A.M., F.S.A.,

St. Patrick Pursuivant and Registrar of the Herald's Office in Ireland.

The asterisk * prefixed denotes that the Pedigree is registered.

Peers marked thus †, have their right admitted to vote on elections of the Representative Temporal Peers of Ireland.

THE PEEBAGE.—The Representatives general of Ancient Families, or of some particular Branch or Sept, and names of proved Milesian descent, are entitled to have their names distinguished in capitals, and their coat-armour blazoned from the Roll.
